

University Vehicle and Golf Cart Parking: Main Building

University Vehicles

University Vehicles may utilize parking spaces on campus denoted specifically for University Vehicles. To ensure adequate parking near the Main Building, Campus Services will make the following adjustments.

- 🦅 Relabel four existing spaces in front of the Main Building from **University Vehicle** to **2 Hour University Vehicle** and one existing space to **30 Minute Loading Zone**.
- 🦅 University Vehicles that routinely park in this area will be outfitted with radio frequency identification (RFID) windshield decals. Campus Services previously equipped many Facilities and University Police vehicles with this technology, which allows garage parking at no charge. Vehicles with RFID decals should park on the **top level of the Bauerle Road Garage**.

Golf Carts

At the Main Building, golf carts may park under the breezeway. Golf carts may not utilize University Vehicle spaces; these are designated for full-size vehicles.

Loading Dock

University Vehicles are encouraged to use the loading dock or All Day UV Parking when their service calls at the Main Building exceeds the 2 Hour University Vehicle parking.
