

## Main Campus (1604) Natural Gas Testing Begins April 12

Natural gas to buildings will be shut down in small segments for testing, as mandated by the State Fire Marshal Office (SFMO), starting Monday, April 12, 2021 and ending on Friday, July 9, 2021. The shutdowns will affect comfort heating, domestic hot water, autoclaves, kitchen equipment using natural gas and emergency power generators.

Facilities will coordinate the exact date and time of each shut down with building occupants. Only natural gas will be impacted. All other utilities, including other compressed gases, will remain operational and available for use. For additional information, reference the list below or contact the Facilities Service Center at (210) 458-4262.

Campus	Buildings (natural gas shut downs April 12, 2021 - July 9, 2021)	
<b>1604</b>	Laurel Village (LV)	Flawn Sciences Bldg. (FLN)
