

During utility work for the new Science and Engineering Building (SEB), additional ADA Parking will be provided in the Ximenes Avenue Lot (see yellow box). The current ADA route (switchback) from the Ximenes Avenue Lot near the AET should be used during this time (red arrows). To access the BSB, BSE, EB, and FLN, enter the AET through the main entrance, then use the first elevator located at the right corridor and take it to the second floor. Exit the elevator to the right and take your first left to locate the exit to these buildings.

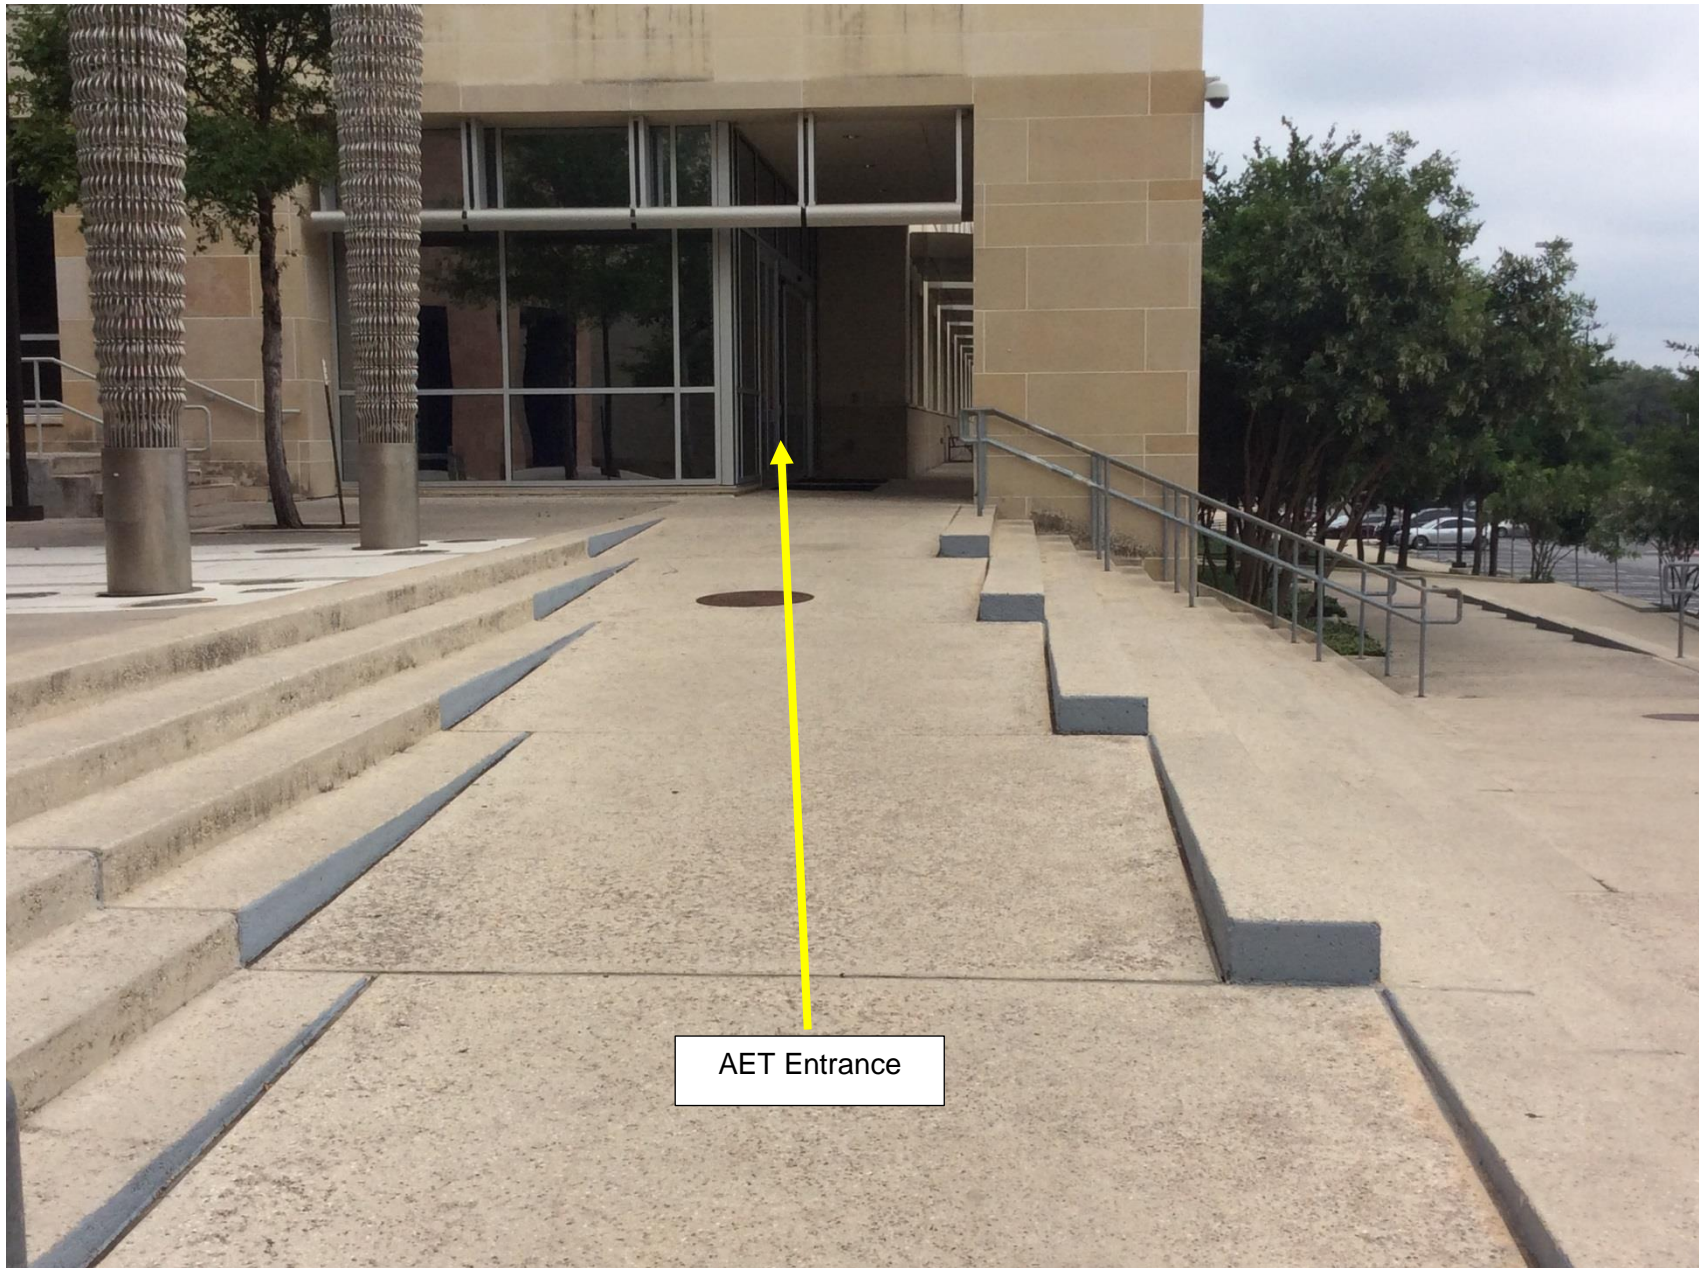

Note: The six ADA parking spaces located at the southeast end of the BSE, in Ford Avenue Lot, will not be available during utility work. Refer to the blue “Area Fenced-off” box to the far right.

ADA Path (switchback) located in front of AET from Ximenes Ave. Lot
