

## Planned Natural Gas Testing Begins May 16

Natural gas to buildings will be shut down in small segments for testing, as mandated by the State Fire Marshal Office (SFMO), starting Monday, May 16, 2022 and ending on Sunday, July 31, 2022. The shutdowns will affect comfort heating, domestic hot water, autoclaves, kitchen equipment using natural gas and emergency power generators.

Facilities will coordinate the exact date and time of each shut down with building occupants. Only natural gas will be impacted. All other utilities, including other compressed gases, will remain operational and available for use. For additional information, reference the list below or contact the Facilities Service Center at (210) 458-4262.

CAMPUS	BUILDINGS	
<b>Main</b>	Alvarez Residence Hall (ARH)	Laurel Village
	Applied Engineering and Technology Building (AET)	Margaret Batts Tobin Laboratories (MBT)
	Biosciences Building (BSB)	Power and Dynamics Systems Laboratory (PDS)
	Business Service Annex (BSA)	Roadrunner Café (RRC)
	Chaparral Village (CV)	Science and Engineering Laboratory (SEL)
	Child Development Center (CDC)	Science and Engineering Building (SEB)
	Chisholm Hall (CH) & Activity Center	Science Research Laboratories (SRL) - includes SAL
	CNG Station (CNG)	Sculpture and Ceramics Graduate Studio (SCG)
	Facilities Services Building (FSB)	Sculpture / Ceramics (SC)
	Facilities Warehouse (FWH)	South Thermal Energy Plant (STEP)
	Green House (GHS)	University Oaks
	Guadalupe Hall (GH)	
	<b>Downtown</b>	Buena Vista Street Building (BVB)
Durango Building (DBB)		
<b>Hemisfair</b>	Institute of Texan Cultures (ITC)	
<b>Park West</b>	Park West – all locations
